## 5. FIRE FIGHTING MEASURES

### Extinguishing media

Extinguishing media Fire can be extinguished using: Alcohol resistant foam. Water spray, fog or mist. Carbon dioxide (CO<sub>2</sub>). Small fires: Dry chemicals, soda ash, lime.

### Special hazards arising from the substance or mixture

Hazardous combustion products During a fire, smoke may contain the original material in addition to combustion products of varying composition which may be toxic and/or irritating. Fire or high temperatures create: Carbon monoxide (CO). Carbon dioxide (CO<sub>2</sub>).

Unusual Fire & Explosion Hazards Violent steam generation or eruption may occur upon application of direct water stream to hot liquids.

### Advice for firefighters

Special Fire Fighting Procedures Keep people away. Isolate fire and deny unnecessary entry. Use water spray to cool fire exposed containers and fire affected zone until fire is out and danger of reignition has passed. Fight fire from protected location or safe distance. Consider the use of unmanned hose holders or monitor nozzles. Immediately withdraw all personnel from the area in case of rising sound from venting safety device or discolouration of the container. Do not use direct water stream. May spread fire. Move container from fire area if this is possible without hazard. Burning liquids may be moved by flushing water to protect personnel and minimize property damage. Contain fire water run-off if possible. Fire water run-off, if not contaminated may cause environmental damage. Review the "Accidental Release Measures" and the "Ecological Information" sections of this MSDS.

Protective equipment for fire-fighters Self contained breathing apparatus and full protective clothing must be worn in case of fire.

## 6. ACCIDENTAL RELEASE MEASURES
